Miney acidic protein - Arabian camel
C;Species Camelus dromedarius (Arabian camel)
C;Species Camelus dromedarius (Arabian camel)
C;Date: 31-Mar-1988 #sequence_revision 31-Mar-1988 #text_change 23-Aug-1997
C;Accession: A24178
R;Beg, O.U.; von Bahr-Lindstrom, H.; Zaidi, Z.H.; Jornvall, H.
Eur. J. Biochem. 159, 195-201, 1986
A;Title: A camel milk whey protein rich in half-cystine. Primary structure, assessment of A;Reference number: A24178; MUID:86300719; PMID:3743571
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                epididymis-specific four-disulfide core protein CE4 - dog

A; Note: the cDNA codons given for residues 1 (AGT) and 63 (CGT) are inconsisten
A; Note: the cDNA codons given for residues 1 (AGT) and 63 (CGT) are inconsisten
A; Note: they actidic protein and the neurophysins resemble each other in the number and pervise there is little detectable similarity between these proteins

R. Gate: 1. T16840
A. Description: The sequence of C. elegans cosmid T10E10.
A. Reference number: 218588
A. Accession: T16840
A. Accession: T16840
A. Accession: T16840
A. Residues: preliminary; translated from GB/EMBL/DDBJ
A. Molecule type: DNA
A. Residues: 1-1101 GEI>
A. Residues: 1-1101 GEI>

A. Title: Cloning and structural characterization of human hair sulfur-rich keratin genes A. Reference number: 837649

A. Reference number: 837649

A. Accession: 837650

A. Structus: preliminary

A. Molecule type: DNA

A. Residues: 1-17, < ZHU>

A. A. Cross-references: EMBL: X63337; NID: 9311879; PIDN: CAA44937.1; PID: 9311880

C. Superfamily: keratin high-sulfur matrix protein IIIA
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Cjaccesion: D96590

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   0; Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   13.7%; Score 28.2; DB 4; Length 5033; 64.6%; Pred. No. 3.4; tive 0; Mismatches 23; Indels 0
TILLE OF INVENTION: Transferrin Receptor Genes NUMBER OF SEQUENCES: 160
CORRESPENDENCE ADDRESS:
ADDRESSE: Sim & McBurney
STREET: 6th Floor, 330 Unviersity Avenue
STATE: Oncario
CUNTRY: Canada
ZIP: M5G 1R7
COMPUTER READABLE FORM:
MEDIUM TYEE: Floppy disk
COMPUTER: IBM PC Compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentln Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US 08/49,518
FILING DATE: 17-MAY-1996
